Allocations are subject to change and should not be considered a recommendation to buy or sell any security.

The numbers prior to March 1, 2024, are hypothetical/model data, calculated using a compilation of Thompson Reuters pricing and secondary market trade quotes. There are inherent limitations of showing data derived from the retroactive application of a model. Unlike actual performance, these results may not accurately reflect the effect of certain material economic or market factors, and therefore, results may be over or under-stated due to the impact of these factors. It is unknown what effects these factors might have had on Palmer Square Capital Management LLC's decision-making if it were actually calculating the Indices during the entire time period.
